・ 移动机器人行业持续增长

From the perspective of capital, 2020 can be said to be a key node in China's mobile robot (AGV) industry. China's AGV (including AMR) industry can be regarded as one of the hottest fields in the robot industry in terms of number of enterprises, financing cases, industry popularity, growth and attention. In 2020, the financing amount of China's mobile robot (AGV) industry exceeded 2.4 billion yuan, with 16 financing cases, with an average financing amount exceeding 150 million yuan.
